

Protect Our Communities (POC) Foundation

Since 2006 POC has been working to protect and preserve backcountry communities and lands from destructive energy projects such as the Sunrise Powerlink. The Sunrise Powerlink is part of a larger plan by SDG&E and SEMPRA to bring more cheap, dirty fossil fuels from overseas into unregulated Mexican powerplants, and eventually through San Diego County up to the LA market.

There are better, cheaper, safer alternatives to the Sunrise Powerlink that will provide for current and future energy consumption and increase the generation of green renewable energy without building the Sunrise Powerlink. Our goal is to provide San Diego County residents the information they need to fight and stop the Sunrise Powerlink and move to smarter local renewable energy sources.

Please visit our website at www.protectourcommunities.org for more information.

Legend

-  Sunrise Powerlink 500kV
-  Sunrise Powerlink 230kV
-  Future SDG&E 500kV T-line
-  Future SDG&E 230kV T-line
-  Substation
-  Power Plant
-  Import Terminal
-  LNG Pipeline
-  Major Road
-  City/Town
